

FOR IMMEDIATE RELEASE

**Eyenvision Inc. Announces Release of Chemistrie Complete:**

PITTSBURGH, Pennsylvania (June 12, 2018) - Eyenvision Inc., a company focused on providing innovative products to the optical industry, including the patented Chemistrie Magnetic lens layering technology, is pleased to announce the release of Chemistrie Complete eyewear.

Previously, Chemistrie Clips were attached to a patient's frame through a micro-magnet that was embedded into patient's Rx lenses. With the release of Chemistrie Complete, the patented micro-magnets will now be blended within the frame. After receiving some customer's feedback regarding hesitation with a magnet being drilled into their primary Rx lenses, Eyenvision has developed a premium clip and frame line to offer everyone the same sun protection that Chemistrie has provided in the past, but with a fresh new look.

Each of the six new Chemistrie Complete styles are available in three unique colors and are made in Italy from a premium acetate to ensure the utmost quality products for all independent ECP's. Each patient who purchases a Chemistrie Complete frame will also receive a grey, brown or G-15 Chemistrie clip. Additionally, 24 polarized sunlens colors, including solid, mirror and gradients, are available as add-on options.

"We are excited about our newest Chemistrie innovation. I am confident that this product will provide a solution for independent ECPs to offer their existing patients a premium method of optical sun protection," commented Joseph Zewe, CEO of Eyenvision, "With Chemistrie Complete, we now have the same trusted and proven Chemistrie Clip with a new look customers will love."

**About Eyenvision Inc.:** Eyenvision Inc. is the developer of innovative consumer products for the optical industry. Under the brand name, Chemistrie, Eyenvision sells its patented Magnetic Lens Layering System series of products that eliminate the challenges typically associated with clip-on eyewear.
